Directions for Internet Registration

1. Before internet registration, a student must contact the school he/she belongs to and specify the course(s) to enroll.
2. The student must do his/her own internet registration. The student is solely responsible for any mistakes that may happen.
3. Internet registration usually is available on specified dates given by NIDA. For any late registration, the student must contact the Registrar's Office and pay the late fees. If no registration is made for a particular semester, the student must maintain his/her student status for that semester.
4. The student may change or cancel the course(s) registered on the internet before pressing the "confirm" button and ordering a print out of the invoice. If there is any change after that, the student must contact his/her specific school.
5. The student's payment is made by the due date at a counter of any of the banks listed. If not, his/her internet registration will be automatically cancelled entirely and his/her re-registration must be made only through the specific school.
6. After the payment is made completely, his/her internet registration generally will be processed on the next office day (excluding holidays and weekends).
7. The entire internet registration will be complete when all the payments are received by the university.
8. For security, the student must log off the system after being finished.

4 ENROLL CANCEL

5. Insert the course code for this module.

6. Insert group number, Young Executive MBA (weekday) is group 1.

7. Click “Submit”.
